

# ABBYY Vantage Connector for M-Files

Leverage Intelligent Data Extraction

## Reach the next level of digital transformation with intelligent document processing

Hyperautomation is here. The ABBYY Vantage Connector for M-Files combines the power of the M-Files content management platform with ABBYY Vantage. Start by easily configuring multiple Vantage Skills in M-Files, assigning each to a document class. Data extracted by Vantage AI is automatically retrieved and can be mapped to metadata properties on the original item or used to create new objects related to it. With Vantage automation, data extracted from an invoice might populate due date, invoice total, and invoice number, as well as creating individual objects for line items and for the vendor, all linked to the original document. This enables M-Files' 360-degree view to provide unparalleled visualization of your data. Drive notifications, dynamic workflows, and global collaboration for your organization. Simply put - don't just extract data, use it.

## Connect M-Files to ABBYY Vantage

Quickly connect your entire content repository to Vantage and instantly utilize skills. ABBYY Vantage already contains 1000's of individual skills that can be used out of the box, with more being added every day.

## Leverage 1000's of ABBYY Vantage Skills

The connector can interact with any number of Vantage skills. Extract data to populate properties, create object and sub-objects. Leverage the power of AI learnings sets contributed by the industry to fast track your process automation digitization.

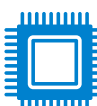

## Enrich your M-Files Metadata

Extracted data can be mapped to properties on content and automatically applied. M-Files workflows can be used to populate approved data in other business thus automating the business process end to end.

## Some Example Use Cases

**Automated Invoice Processing and Data Extraction**

**Form 1040 Processing and Data Extraction**

**Bank Statement Processing and Data Extraction**

**Identity Document Processing and Data Extraction**

**Workflow Routing based on Extracted Data**

**Retention Policy Application based on Extracted Data**

### Why ABBYY Vantage?

**AI-powered**  
No templates or setting up rules required; always learning

**Intelligent**  
Understands virtually any document

**Designed for business users**  
No coding required; design and train skills in a matter of hours

**Platform-independent**  
Integrates with automation platforms, systems of engagement, and more

**Cloud-native**  
Web-based platform with containerized infrastructure for easy deployment and scalability

**Highly extensible**  
Wide range of pre-trained skills from ABBYY and our partners available in ABBYY Marketplace

**Insightful**  
Provides a detailed overview of the performance of your document-based business processes

**Skilled**  
Augments human workforce by making human-like intelligent decisions
